

If you want to add a new leg with already existing 'Quote number', Leon will issue a **warning** with the schedule information of the existing quotation.

On the screenshot below there is a trip with the 'Quote no.' **5544332211**.

Date	STD	ADEP	ADES	STA	PAX	ADEP handling	ADES handling

Below is an example of the warning that Leon issues - a new flight that is about to be added has the same 'Quote no.' as the trip above.

It is still possible to add such a flight - the warning is just an information.

Start	End	Break	FDP	Limit	Next EOBT
25-02-2014 23:30	00:00	--:--	00:30	11:00	26-02 11:30 (13:30)
