Flight details update

To check flight details select it in the calendar and click it when it appears below the calendar. Leon will show **3 tabs**, each displaying different trip data.

Flight

Flight details in Leon mobile application

A tab **Flight** contains all most important flight details on top of the screen, such as:

- Flight number
- Aircraft registration
- STD
- ADEP
- ADES
- STA

Below Leon shows additional information:

- Date
- ADEP & ADES name & UTC difference
- ALTN airports
- ICAO trip type

Journey Log data viewing in Leon mobile application

Journey Log tab shows all post-flight data previously inserted into Leon. The screen is divided into **2** parts:

- Full JL mandatory fields details displayed are: date, ADEP & ADES codes, BLOFF, T/O, LDG, BLON, MAX FL, Block fuel, Fuel remaining.
- **Optional fields** all other details enabled in Leon section Settings, i.e.: uplift, pilot flying, delay code, PAX, cargo, etc...

Journey Log can only be viewed. An option of adding Journey Log data will be added in one of the future releases
