If you come across a bug, an error or any irregularity in a **NEW LEON** interface, **you can report it** to us by using a new feature - **Report a bug**.

In the top-right corner of the screen hover the mouse over the wrench-icon and select 'Report a bug'.

A pop-up window will show up. Click **Mark region** and **highlight a specific region** of the screen (if Leon issued any information about the bug or if there is anything incorrectly displayed) or you can **describe the problem** in the field **Your feedback**.

You can view what actually will be sent to Leon by clicking **Show data to send**.

Once you have attached screenshots and described the problem, click **Send** and the email will arrive to **Leon Support Team**. We will try to solve the issue as soon as possible.
