No handling needed at home base

'No handling needed at home base' option in aircraft profile

Some operators don't use handling in their homebase, so you can mark a checkbox **No handling needed at home base** in a section Settings > Fleet Edit and save yourself an extra work in the checklist. This option relates only to the airport inserted into a field 'Home base' in an aircraft profile.

Once it is ticked and saved, any flight scheduled to or from Home Base will automatically have its Handling status in the OPS checklist changed to 'Not applicable'.
