

CLOSING JOURNEY LOG

We have added an option to **close the Journey Log** in a section OPS. Once the Journey Log has been closed, it will not be possible to edit it in the mobile application - editing of such Journey Log will be only possible in the Leon's web-version. It will also be possible to view all closed Journey Logs in the Report Wizard.

First step is activating a new item: **Status** in the Journey Log - go to a section Settings > Flight Editing and mark that item, then save changes.

Journey Log Items

☒ Status

When adding JL data, the last item of the JL will be the 'Status' -

Status:

Closed

If the Journey Log has the status 'Closed', editing will **NOT** be possible in **Leon mobile application**, only in the web-version.

In the mobile app, when crew member clicks 'Log' button and the Journey Log has been closed in OPS panel, Leon will show a message as below:

FLIGHT

ABCD123 A-BCDE 01:00 z WAW - WRO 04:00 z

Journey log closed

This journey log was closed in Leon.

If it happens that a Journey Log's **draft** has been created in the mobile app and in the meantime that Journey Log has been closed, Leon will show the information and an option to **remove** the draft.

Draft

This journey log has a draft, however it cannot be saved as this journey log is closed already.

REMOVE DRAFT

It will also be possible to view all closed Journey Logs in the **Report Wizard** by adding a column 'Status [JL]'.

Status [JL]
closed
closed
closed

And also in the **filter** there will be an option to view flights with open or closed Journey Log only.

Add value(s) for Status [JL] filter
