

# IATA SERVICE TYPE

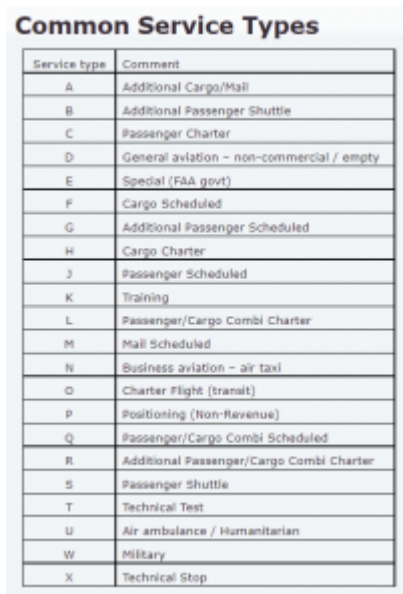

It is possible to include **IATA Service Type** when sending **ASM** or **SSIM** messages from Leon.

The **1st step** is to enable this functionality by marking a checkbox **Show IATA service type**  in the Admin panel, section 'Flight Editing'. In the same section it's possible to define a **default** IATA Service

type **Default IATA service type**

All available IATA Service types are explained in the screenshot on the right.

When enabled, the IATA Service type will show for each flight in the 'OPS' panel, tab 'FLIGHT'- it can be manually changed if necessary.
