

'Flight change' feature modifications

Changes to the 'Flight change' feature in the OPS module will be introduced.

New colour coding

☐ FW & JL Flight No.

<div></div>		TEST001
<div></div>		TEST002
<div></div>		TEST003

Flight change status in OPS Table

The colour coding used in that feature will be changed for a better reflection of its logic. It is explained in the table below.

Old colour	New colour	Meaning
		New - the flight has been created and hasn't been acknowledged yet
		Acknowledged - the flight is acknowledged and there are no new changes
		Changed - the flight was acknowledged already but has been changed after that

08:00 EPWA-LFPB 10:25
CREW 5 PAX / — ●●

14:00 EGNH-EPWA 16:40
CREW 5 PAX / — ●●

17:30 EPWA-EPMO 18:10
CREW — / — ●●

Flight change status in OPS Calendar

Flight change status in OPS Timeline

The changes which trigger the status change from 'acknowledged' to 'changed' are as before:

- aircraft
- flight number
- airports
- times
- crew

In OPS Table, the 'Flight change' column has to be enabled in View Settings - Columns.

Feature added to OPS Calendar and OPS Timeline

The feature, previously present in OPS Table, will be added to OPS Calendar and OPS Timeline as well. In both cases, the status will be indicated as a colour-coded left border of the flight.

Dedicated button in the context menu

The status will be changed to 'acknowledged' by clicking the corresponding button in the context (right-click) menu of the flight.

The buttons will appear only if the status is different than 'acknowledged'.

✓ **ACKNOWLEDGE NEW**

- appears if at least one of the selected flights is 'new'

✓ **ACKNOWLEDGE CHANGED**

- appears if at least one of the selected flights is 'changed', and none of them is 'new'

The status will not be automatically changed to 'acknowledged' on generating the Flight Order document anymore.
