

Entry & Exit Points in Overflight Permits

'Entry & Exit Points' auto-fill option

In the 102-nd release of LEON an option to search for list of countries for Overflight permits was introduced. With the current release, an additional functionality has been implemented to **automatically fill Entry & Exit points** in the permit request pop-up window.

The Entry and Exit points will get filled once search for the countries button has been selected.

Press **GET COUNTRY LIST** button and once the list of countries appear, you can check if all the necessary countries are listed, and remove unnecessary ones.

Alongside the country list the system will suggest and auto-fill all the **Entry and Exit points** for each of the countries listed.

The points can be overwritten if necessary.

Once all information is reviewed, Requests can be sent, and the Permit pop-up window closed by pressing SAVE button.
