Adding an animal to PAX list in Leon

If it happens that there will be an **animal** on the aircraft, you can add and store its details in Leon database. You add an animal in the same way as a person, with one exception.

Open right-hand filter, click the icon and when 'Edit Person' window appears, mark a checkbox Animal, add animal's name, DoB and a passport. You can also add animal's preferences (favourite food for example) - this information will show on Trip Sheet document.

Animal's details will also show on **Pax Manifest** document.
