

The screenshot shows a software interface for managing quote requests. At the top, there's a header with tabs like 'Mainframe', 'Actions', and 'Status' (set to 'Unfinished'). Below this, there are fields for 'Quote request ID', 'Requested by', 'Assignee', and 'Email & LMS-emails'. A 'Status' dropdown menu is open, showing options like 'New', 'Quoted', 'Contract sent', 'Booked', 'Invoice sent', 'Done', and 'Rejected'. Below the status dropdown, there's a flight plan table with columns for 'ADEP', 'ADES', 'TBA', 'Departure LT', 'Arrival LT', 'Block Time', 'Flight Time', 'GCR/NIR', 'FAX', 'Ferry', and 'Notes'. The table shows two flights from LPBM to LPML. At the bottom of the interface, there are buttons for 'ADD PASSENGER', 'SEARCH FLIGHT', 'CALCULATE FLIGHT TIME', and 'SEND SUB-CHARTER / COMPARE PRICE'.

Statuses selected in the settings

Quote Request Statuses setting allows selecting the default request statuses.

This option is located in the Admin Panel > General Settings > 'Sales Module' tab.

All the statuses are available in the dropdown and once selected, they appear in the list below the dropdown.

The screenshot shows a configuration page for 'Quote request statuses'. It features a dropdown menu at the top and a list of seven status icons below it: 'New request', 'Quoted', 'Contract sent', 'Booked', 'Invoice sent', 'Done', and 'Rejected'. The 'Rejected' icon has a red circle with a white 'X' over it, indicating it can be removed.

Upon saving, the statuses will update in the request edit section (as per screen on the right).

To remove the status from the list simply click on the status icon - - and save the updated settings.
