

APIS Data

Due to the fact that lots of destinations require **Crew APIS** data, we have made available a simple report (section Reports > Crew) containing crew details such as:

A screenshot of a web application showing a table of crew data. The table has multiple columns, including names, dates, and other identifiers. A sidebar on the right shows a navigation menu with 'Reports' and 'Crew' options.

Report 'APIS Data' - crew main details available to be sent to authorities

- **Name & Surname**
- **Gender**
- **Date of birth**
- **Nationality**
- **Travel document type**
- **Travel document number**
- **Country of issue**
- **Date of expiry**

All the above details **must** be inserted into crew profiles to be correctly displayed in this report. A link to export this report to **Excel** is available in top-left corner of the screen.

In the filter you can insert **crew codes** to narrow down the list of crew and also filter by a **Position type**, plus it's possible to display **deleted users**.
