

Find Aircraft functionality

It is possible to use the **Find aircraft** functionality while adding the request in Leon.

This functionality allows searching for the available aircraft for the requested route within Operator's own fleet.

How it works

'Find aircraft' functionality

Find Aircraft functionality works in the following way:

1. Click on **NEW QUOTE**.
2. Insert all the required details in the **Add new quote request** pop-up window **including the routing**.
3. Click on the  icon to **search for the available aircraft**.
4. **Find aircraft** pop-up window will open with the available aircraft, including the Request price (as per screenshot on the right).
5. Select the aircraft and press the **ADD** button. Selected aircraft will be added to the 'Aircraft' section in the 'Add new quote request' window.

6. Press the **CREATE** button to create the requests on the selected aircraft.
