

# NEW FUNCTIONALITIES IN SALES PANEL

New functionalities are introduced to the Leon Sales panel.

## Amenities & Cost in Subcharters

### Amenities

It is possible to add **Amenities** when creating a quote on **Subcharter** aircraft. In the quote's edition for Subcharter, we added a new tab 'Amenities' where it's possible to add several amenities, such as:

- **Smoking & Wifi** - mark checkboxes to enable them.
- **Wifi type** - select between Internat via Satcom, KA band, KU band, SBB (Swift Broadband) and Iridium.
- **Cabin details** - width, height, length and volume.
- **Baggage capacity** - add a number of items.

BASIC		MESSAGES		AMENITIES	
Smoking	<input type="checkbox"/>	Cabin width	<input type="text" value="2.5 m"/>	Cabin Volume	<input type="text"/>
WiFi	<input checked="" type="checkbox"/>	Cabin height	<input type="text" value="2.7 m"/>	Baggage capacity	<input type="text" value="23 items"/>
Wifi type	<input type="text" value="Internet via Satcom"/>	Cabin length	<input type="text" value="23 m"/>		

Once the 'Amenities' have been added and saved, Leon will remember the items when the next trip on the same subcharter is performed.

Amenities can be added to 'Flight Quotation' document, by using item: 'quote > aircraft > aircraftAmenities' from 'Available data' of the [Documents Manager](#) panel.

Leon will also show 'Wifi' & 'Smoking' amenities for Subcharters downloaded from **Avinode**, which are defined in Avinode's section: Aircraft > Fleet edition > Update amenities.

#### Subcharter price section

It is now possible to calculate the subcharter price based on the cost.

The 'Price' section is now located above the tabs with the subcharter details.

It allows inserting more detailed price that includes:

- **Operator price** - the amount charged by the operator (subcharter price)
- **Third party commission** - commission paid to the third-party broker
- **Margin** - income margin calculated on top of the total cost

Based on the above elements, the total price is calculated as:

$$\text{Price} = ('Operator\ price' + 'Third\ party\ commission') / (100\% - 'Margin'\%)$$

The total price is not editable and keeps the same currency as the price breakdown.
