FUEL STOP OVERVIEW

'Fuel Stop' Overview

We have implemented a new functionality to the **CREATE FUEL STOP** pop-up window in the 'Requests Quotes' panel.

Before applying a fuel stop to a given trip, it is now possible to get a **quick overview** of how the particular fuel stop will affect the trip in terms of any additional Block Times & Flight Times as well as the Distance.

By clicking the selected airport, details of the trip will appear at the bottom of the window, underneath the map.

Clicking **Apply** will add the selected airport in which the fuel stop will be required to the quotation.
