

NEW FUNCTIONALITIES

Comments

We have implemented a new option, that will be very helpful in communication between people of sales department. If one person leaves a comment, another person entering 'Requests/Quotes' panel will be able to see it **on top of the list of quotes**.

It is now possible to view a new column **COMMENTS** in 'Requests/Quotes' panel (once it's added to the 3-dot filter in top-right corner of the page)

Columns

☒ ID

☒ Requester

☒ Itinerary

☒ Assignee

☒ Comments

☒ Status

☒ Aircraft

☒ Updated

☒ Quote

CLEAR ALL

SELECT ALL

In this column Leon will show all comments added in the quote's edition - unread

1

 and read

1

 (as on the screenshot below).

Comments	
1	1
3	3
0	3

Changes in modifying schedule

1. When changing **Block time** of the flight, Leon will automatically change **Flight time** by the same value and will also show a tooltip with a question, whether it should be departure or arrival time should be updated.

09:00	09:15	09:30	10:00	10:30	11:00	11:30	12:00	12:30	13:00	13:30	14:00	14:30	15:00	15:30	16:00	16:30	17:00	17:30	18:00	18:15	18:30	18:45	19:00	19:15	19:30	19:45	20:00	20:15	20:30	20:45	21:00	21:15	21:30	21:45	22:00	22:15	22:30	22:45	23:00	23:15	23:30	23:45	24:00																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																					
																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																</

2. When changing **Flight time** of the flight, Leon will change **Block time** automatically and will keep initial Taxi times.
