Minimum Flight Time setting

Minimum Flight Time is the new option that has been added to Settings > Fleet > Performance tab.

"Advanced" and "Simple" performance calculation modes prove more efficient for longer distances. Unfortunately, they are less accurate at short distances due to departure and loading procedures.

The time inserted in this field will be used if the calculated flight time is shorter than this value (in minutes).

Below you can see the examples.

1. Block and flight times without 'Minimum Flight Time' set:

Aircraft D-LEON				Price	0	USD	٥					
ADEP	ADES	в тва	De	Departure LT		Arrival LT		Block Time	Flight Time	PAX	Ferry	+
EPWA	EPRA		25	Apr 2020	09:00	25 Apr 2020	09:30	00:30	00:11	0		

2. View in 'OPS' section displayed in 'Block' column and calculated as *Minimum Flight Time* + *Taxi times*:

Aircraft		Flight No.	Date	STD	Departure	Destination	STA	Block	Crew	PAX	Ferry	+
