Aircraft & Airport fees in the quote

There are **2** ways of creating price valuation: manual entering price for entire quote and using detailed price list for an aircraft and airports.

You can manually enter the **Price** in the field next to **Aircraft**. This field is only editable when detailed price list is not added.

Be advised that when the quote is imported from Avinode and an aircraft is configured in a section FEES, detailed price list shows automatically an original **Avinode** price is always displayed next to it and can not be changed.

Once you have added Request & Itinerary details and selected the aircraft, click **ADD QUOTE** button and Leon will show a new section **Quote** below with Aircraft Fees & Airport Fees (previously defined in the section [Fees](#)).

In this section you can manage the price list:

1. Add new item
2. Change item's name
3. Change items quantity and their price.
4. Delete item.
5. Switch price lists to another aircraft price list (by using a button Recalculate).

Each item is **editable**, which means you can change its name (for edited flight only - default name remains the same) and/or its price.

When you click on the arrow next to the price, Leon will show both airports. The default fee will show for ADEP only but you can still add fees to ADES manually. Another option is adding **new fee** available in the drop-down box below the items. When changing fees manually, Leon shows **Total** price simultaneously changed at the same time. Each item can be removed by clicking the icon 

Catering Fee				EUR	384.87	^
EPWA	3	x	128.29	EUR	384.87	
EHAM	3	x		EUR		

If it comes to Aircraft Fees displayed below Airport Fees, you can also change their names and overwrite values.

Catering	6	x	500	EUR	3000.00	
Ferry Flight Fee	00:00	x	150	EUR	0.00	
Flight Plan	2	x	750	EUR	1500.00	

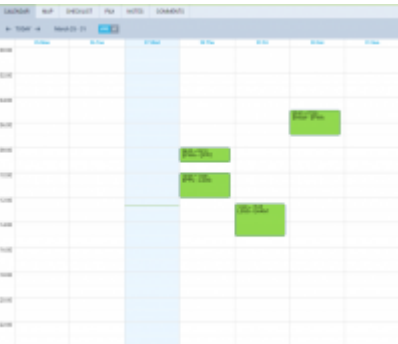

Use the button **RECALCULATE** to switch between previously defined Aircraft Fees.
