# Updating quote based on the trip change improvement

We have added a new setting which will improve updating quote when the trip is changed in OPS section and will make working on the quote less time consuming.

In the **General Settings > Sales Module** panel, there are **4** options available to set up how Leon should react when there was a change made in the trip of the quote.

Update schedule but keep the price

An example below shows the quote with the price of 25000 €, where the STA of the trip was **changed** - Leon **updated** the schedule, but has **kept** the price **unchanged**.

Aircraft	B-ARTI		Price	25000		EUR	VAT		%

Update schedule and recalculate the price

On the below example, after block time change, Leon updated the schedule but also recalculated the price of the quote.
