

SCHED new functionalities

Aircraft selection

Once the schedule has been added in SCHED panel, you can select whether it should be published with the initially assigned virtual aircraft, or with the existing one.

Select flights (use Shift or Ctrl to mark multiple legs) and click the icon  - Leon will show a pop-up window, where you will be able to either leave the same aircraft as it was selected when creating the schedule, or select between **existing aircraft** for the schedule publication (no option to select a different virtual tail).

You are about to publish 3 pairings from 1 Jun to 5 Jun.
You can select which virtual aircraft will be changed to existing ones, when publishing.

Once the schedule has been published with an existing aircraft, you will find it in OPS panel.

987	Mon	01 Jun	12:00	LTN	OPO	15:30	03:30	-	-	A-BCDE
987	Wed	03 Jun	12:00	LTN	OPO	15:30	03:30	-	-	A-BCDE
987	Fri	05 Jun	12:00	LTN	OPO	15:30	03:30	-	-	A-BCDE

UTC/Base Time

Another useful option we have added to SCHED panel is switching between **UTC** and **Base Time**.

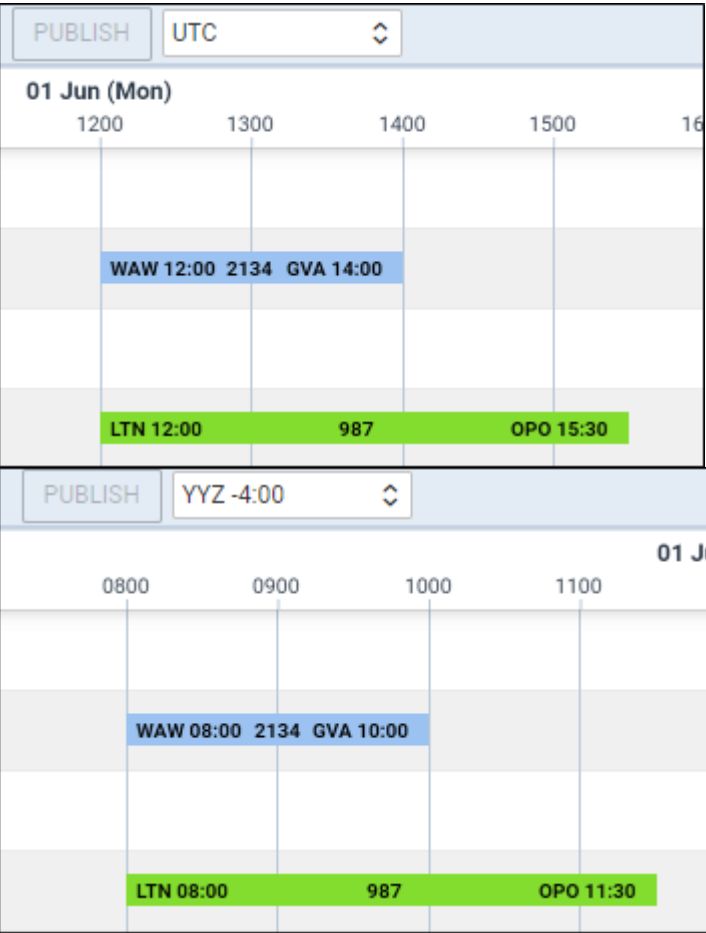

In 'General Settings' panel you can define **Bases** (and then assign aircraft and crew to particular Base).

Leonsoftware Wiki - <https://wiki.leonsoftware.com/>

Bases			
Name		Time zone	
WAW		Warsaw (PL, UTC+02:00)	✓
LHR		London (GB, UTC+01:00)	✓ ✗
VKO		Moscow (RU, UTC+03:00)	✓ ✗
YYZ		Toronto (CA, UTC-04:00)	✓ ✗

In SCHED main page, right next to the button 'Publish', you can find a drop-down box with the list of predefined Bases, as well as UTC (which shows by default).

When switching between Bases, Leon will show appropriate ADEP & ADES times on the flight-belt (see example below).

UTC/BT selection option when creating a new schedule

An option to select between UTC & chosen BT also appears when creating a

NEW SCHEDULE

A screenshot on the right shows an example, where a Base YYT -4:00 has been selected - when adding a new schedule Leon shows a possibility to choose between UTC & BT -4:00.

The same shows when you
