An extra option in filtering flights

Filtering flights by a partial ICAO code

A tab 'MORE', in the left-hand filter of SCHEDULE, allows you to **filter** flights by a particular flight number, client or an airport.

Right now it is possible to filter flights by entering into a field **Airport** a partial ICAO airport code, followed by *

So if you want to view all flights TO/FROM Great Britain, you should enter **EG***, if all flights TO/FROM Germany, enter **ED***, etc...

You can also view flights between particular countries by clicking a blue link **more** (which makes Airport field is split into ADEP & ADES) and add the same format of airports codes, i.e. to view all flights between Great Britain and Germany you should enter details as below:

ADEP - EP* ADES - EG*

This option is available in SCHEDULE section **ONLY**.
