# Meals for Crew

We have added an option to mark if **crew** will be provided with **meals** during their duty.

In a section Checklist > CREW click on the icon  and select type of a meal. Once it's done the icon will turn to green to indicate that meals have been added.

Report 'Lunch & Dinner' - a list of crew who have had meals provided

You can also generate a report **Crew > Lunch & Dinner** which shows a list of all crew for whom meals were provided, in a selected period of time. It is possible to select a particular crew member from a drop-down box.

When you hover the mouse over the crew code in this report, Leon will display information about the flights (flight number, date, STD, ADEP, ADES, STA) on which meals were served to the crew.

| Code | Person | Brekfasts | Lunches | Dinners |
