

View Settings

We have removed tab 'SHOW' from the left filter and replaced it with a new functionality of **View Settings**.

Each Leon user can define his **own view** of the schedule list. It is possible to add or remove **columns**, decide if ACFT or Flight number should appear with a **colour**, if Leon should show any **warnings**, **cautions** or **notices** and to define **preferred airport code** as well as **timezone**.

To access the panel click  icon in top-right corner of the screen.

Columns

Leon allows to add more **columns** to the overall schedule view (apart from the default ones, such as: FW & JL, Flight No., Day, Date, STD, ADEP, ADES, STA, ACFT, PAX, Tags) - click 'Columns' and mark appropriate checkbox, then click 'APPLY'.

Colours

Here you can define if Leon should colour **Flight No.** column and/or **ACFT** column, as well if Leon should dim ferry legs. By marking a checkbox **Entire leg row** Leon will colour an entire row, either with the flight type colour (if 'Aircraft colours' checkbox is left unmarked), or with an aircraft colour (if 'Aircraft colours' checkbox is marked). If both checkboxes (Flight type & Aircraft colours) are marked - Leon will show an aircraft colours as this colour has priority over flight type one.

Warnings

All **warnings** in Leon are displayed in red. Here, you can mark particular (or all) checkboxes and if i.e.: PAX passport is expired, crew FTL violated or crew endorsement is expired - Leon will show PAX number value in red  just like crew codes. User can hover the mouse over the alerted item to see details.

Cautions

Here you can mark checkboxes for particular cautions, i.e.: PAX passport missing, Airport cat B or HIL restriction, which Leon shows in the Table page in yellow  Hover the mouse over the alerted item to see details.

Notices

Notices are displayed in the Table page in white  and can be turned on for items like i.e.: Airport

note, Flight diverted or Aircraft documents expired. Hover the mouse over the alerted item to see details.

Preferred airport code

Switch between **ICAO** & **IATA** airport codes to be displayed in the Schedule section (Table, Calendar or Timeline).

Timezone

Here you can choose if Leon should show STD & STA times in **UTC**, **LT** (at ADEP/ADES airports) or **Base Time** (defined in an user's profile).
