Soon we will remove entire section OPS from Leon, however, it does not mean that you will not be able to see its sub-sections anymore - they will be still available for the usage.

Below sub-sections will be moved to section Admin

- **Fleet**
- **Funtions**
- **Flight codes**
- **Operator colours**
- **Services**

> Availability of section Admin **does not** mean that a particular user has now access to other admin sub-sections, like: Users, Privileges or Operator Settings.

Old Airport Directory is going to be completely removed as it is available in the menu bar (see below).

Notifications will also be moved from section Flights to Admin
