

Soon we will remove entire section OPS from Leon, however, it does not mean that you will not be able to use its sub-sections anymore - they will be still available for the usage.

Below sub-sections will be moved to section Admin

- **Fleet**
- **Functions**
- **Flight codes**
- **Operator colours**
- **Services**

Airport Directory is going to be completely removed as it is available in the menu bar (see below).

Sub-section **Notifications** will also be moved from section Flights to Admin and **Weight & Balance Simulation** will be moved from OPS to Flights.

Availability of section Admin **does not** mean that a particular user has now access to other admin sub-sections, like: **Users, Privileges** or **Operator Settings**.
