SSM & ASM message examples

We have improved sending automatically SSM & ASM messages from Leon.

Before, it was only possible to set up sending automatically SSIM and/or ASM messages.

Now, it is possible to select one of the scenarios from the list (in a section ADMIN > SSIM/ASM), including a new one **SSM & ASM**.

Send automatically	SSM & ASM	0
To email	None	
	SSIM	
From Email	ASM	

When this new scenario is selected. Leon will:

- 1. **Send SSM message** for a new flight which STD is <u>later</u> than 24h from current time.
- 2. Send SSM message for flight update.
- 3. Send ASM message if the STD of the flight is within 24h. Once ASM message has already been sent, Leon will send another ASM message, if any changes have been made to the flight.
