

In the past, when you added either **positioning, training, or office duty** (duties with the  or the  icon) - the number of items in the 'Legs Info' screen was the same as when adding a new flight. In other words, items were those defined in **Admin > Operator Settings > Flight Editing** section.

From now the number of items for such duties is reduced to minimum by default. Please see examples below.

-  - available fields in 'Legs Info' screen are: hotel, ops notes, notes.
-  - available fields in 'Legs Info' screen are: crew aware of trip, crew transport, hotel, ops notes, notes.
