

In the past, when you added either **positioning, training, or office duty** (duties with the  or the  icon in the 'Flights List' section) - the number of items in the 'Legs Info' screen was the same as when adding a new flight. In other words, items were those defined in **Admin > Operator Settings > Flight Editing** section.

	PSN	1	12-05	12:00	WAW	WRO	18:00
	OFFICE	2	13-05	12:00	WAW	WAW	18:00

From now, **the number of items for such duties is reduced to minimum** by default. Please see examples below.

-  - available fields in 'Legs Info' screen are: **hotel, ops notes, notes.**

Ops notes

Notes

(max. 2MB)
