There are **3 options** that can be implemented for the purpose of **days-off calculation**:

- **Rule 1 - default where day off is one for which there is no flights, with appropriate number of free nights**
- **Rule 2 - day off is one for which there is no flights (option 0) and no duties defined in the roster**
- **Rule 3 - day off is one for which there is no flights (option 0) and that day is marked as off in the roster**

These options will influence the way days-off are showing on Flights List, FTL Sheet and Crew Duties screen.

In orded to choose any other rule but Rule 1, you should contact Leon Software Support.
