

Apart from **90 days currency** of the crew that must be monitored by operators (click [here](#) for more information, section 'Cockpit crew status') some operators have to track that the **crew have flown at least once** in the last **28** (Europe) or **30** (Asia) days - that includes '**Simulator**' flights.

You can easily check if a particular crew member has flown in the required period of time by going to the section Crew Duties table and hover the mouse over the status-dot. Make sure that in the filter the checkbox '**28 days currency (cockpit)**' is ticked (see below).

Cockpit crew status
☐ 90 days currency (cockpit)
☒ 28 days currency (cockpit)
☐ Endorsements required for dispatch

Leon will update 28/30 days currency if 1 of the below requirements is fulfilled:

- **1** - a crew member has been added to a flight (**New Flight** section, type 'Commercial') - 'Journey Log' required.
- **2** - a crew member has been added to a flight (**New Flight** section, type 'Simulator') - no 'Journey Log' required.
- **3** - a duty type 'training' has been assigned (**Crew Duties** section) i.e. 'Simulator' or 'Training'.
