

Go to the section OPS > Fleet > Fleet Edit to define a **Minimum Ground Time** (in minutes).

Performance	
Climb rate (ft / min)	<input type="text" value="2000"/>
Descent rate (ft / min)	<input type="text" value="2000"/>
Max FL	<input type="text" value="0"/>
Speed in 1st h of flight (knots = NM / h)	<input type="text" value="250"/>
TAS (knots = NM / h)	<input type="text" value="460"/>
Minimum Ground Time (minutes)	<input type="text" value="20"/>
Max range with 0 PAX (NM)	<input type="text" value="0"/>
Max range with max PAX (NM)	<input type="text" value="0"/>

Once it is set, when you add a new trip and the difference between STA of the last leg and STD of the new leg is less than 'Minimum Ground Time', Leon will display a warning (see example below).

Aircraft	Flight No.	Date	Report.	STD	ADEP	ADES	STA	Block	Distance	RF?
D-LEON	MAN100	01-03-2015	AUTO	11:25	MAN	WAW	14:15	02:50	0	A
New Leg							02:50			

Operation collisions
Flight 01-03-2015 11:25 MAN - WAW 14:15 (minimum ground time of 20 minutes is exceeded) is collided with:
SP123 01-03-2015 10:00 AMS - MAN 11:15 D-LEON

11:15 - STA of the last leg
11:25 - STD of the new leg
Minimum Ground Time of 20 minutes is exceeded
