

Aircraft Profile

Managing a large fleet can be difficult not only when it comes to organising the flight but also to providing all the necessary information about the aircraft. In our newest Leon Buddy, Daniel Saluda from our customer support team shows you where you can find all the crucial information regarding your aircraft profile.

If your client needs additional information, for example if the aircraft has WiFi or an additional seat to take an extra crew member, all of it can be found in the aircraft profile.

Disclaimer: Please note some details in this video may differ from the actual application view. This is due to constant software development. This video will be updated if any major changes are made to its content.
